

## LET 51 Exchange Truck

### PRODUCT DESCRIPTION

The LET 51 Exchange Truck is virtually maintenance free and designed for long life. This truck is manufactured of tough polyethylene and available in a variety of colors. The top flange provides the additional strength to hold up under the heavy load and minimize truck distortion.

This good looking truck is built for utility and ruggedness. Optional mold-in graphics permit you to uniquely identify your unit and proudly display your company's name and logo. Optional stenciling provides shorter term identification or tare weights.

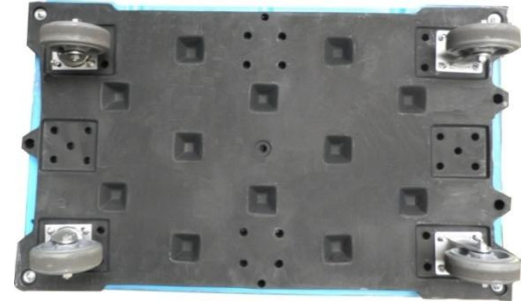

**Clean Linen & Infection Control** - Use the molded hinged lid with the Velcroed front closure protects and secures contents. This option eliminates the need for awkward, high maintenance separate cart covers. Ask us about other additional options that will improve infection control for contents.

**Steel-Reinforced Poly Base-** The Dura-Cast steel reinforced plastic base is tough because of the molded-in steel reinforcing bars, yet it won't rust.

**Completely Assembled-** Trucks are delivered completely assembled and production-ready so that they can go directly from your loading dock into service. These trucks will continue to perform for years in the toughest conditions.

### Specifications

Overall Dimensions	47" wide x 29" deep x 68" high (with 6" casters)
Approximate Weight	135 lbs. (with 6" casters)
Average Wall Thickness	.250 in.
Truck Body	Made of high-density linear polyethylene resin. Drain holes in bottom.
Ergonomically Designed	Helps reduce worker-related injuries
Optional Engraved Logo	Optional engraved logo of your choice molded into truck body
Molded-In Date of Manufacture	Facilitates accurate asset management
Hand-hold Cutouts	Provide secure control of truck
Interlocking Shelves	Shelves interlock when in bulk upright position to secure truck contents
Steel-Reinforced Poly-Base	Made of high-density linear polyethylene resin with 2 enclosed internal steel reinforcement bars that act as torsion bars and won't rust
Casters	Choice of sizes and configurations of swivel & rigid casters with thread guards
Bolt-through Caster Mounting	Bolt-through caster mounting ensures that truck body base and casters are one integral unit with strength to support heavy loads
Optional Tow Plates	Ask about various systems available to tow multiple carts. This increases efficiency and reduces worker fatigue from moving carts over long distances
Completely Assembled	Ready for immediate deployment & service
